As a Full (MERN) stack developer, use MongoDB, Express, React, and Node.js to create full-stack applications. Your experience in managing projects and working in teams will help you contribute effectively to various user-focused projects.

SKILLS

- **Programming Languages:** C, C++, JavaScript
- **Frontend Development:** HTML5, CSS3, Bootstrap, Tailwind, ReactJS
- **Backend Development:** Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Additional Skills:** Object-Oriented Programming, Git, Redux, JWT (JSON Web Tokens), Canva

PROJECTS

- **Fully Responsive Website (GitHub Repo)**

The project includes creating a responsive website using HTML, CSS, and JavaScript. The goal was to develop a visually appealing, user-friendly, and interactive website that provides a seamless viewing experience across different devices.

- **Smartcart (Live Project Link)**

Created a modern and responsive Smartcart web application for an e-commerce platform. The application allows users to view various products with their details, add items to the cart, remove them, and displays order details along with the final checkout price.

- **User With Multi Addresses**

I created The Simple Project, a platform where multiple users can sign up, each with the ability to have multiple addresses and their own avatar image, along with personal details. Technologies Used: React, Node.js, MySQL

- **To-Do Web App Backend API**

Technologies Used: Node.js, MongoDB, Mongoose, Express
Built a backend API for a To-Do web app, including endpoints to create, update, delete, and retrieve to-do items.
